

Bhupender

Data Analyst | BI Engineer

Warsaw, Poland | +48 453247555 | bb.datasage@gmail.com | <https://www.linkedin.com/in/bhupender-/> | <https://bhupender-bhupender.github.io/>

PROFESSIONAL SUMMARY

Data Analyst with 3+ years of combined experience supporting finance, operations, and business reporting across service-based and manufacturing environments. Skilled in SQL, Python, Power BI, Excel, and Azure-supported workflows, with hands-on experience in requirements gathering, KPI/SLA definition, data validation, reconciliation, dashboard development, and reporting automation. Strong at translating business needs into accurate, decision-ready reports and dashboards.

PROFESSIONAL EXPERIENCE

SoftTech Solutions | Data Analyst | Remote | Jul 2023 - Jan 2026

- Partnered with finance, operations, and business stakeholders to gather reporting requirements, define KPI/SLA logic, document metric definitions, and align source systems, report cadence, and expected outputs.
- Extracted, cleaned, and prepared recurring finance and operational datasets, including invoice and payment records, budget summaries, transactional extracts, sales data, and system-generated files, using SQL, Python, and Excel Power Query; reduced manual data preparation by ~4 hours per reporting cycle.
- Built end-to-end data validation and reconciliation checks across freshness, row counts, null and duplicate records, schema, and referential integrity; reduced recurring reporting defects by 40% (5 to 3 per month).
- Reconciled source extracts, transformed datasets, and final reports by comparing totals, counts, and record-level details to identify missing records, duplicate entries, and logic-based variances before stakeholder delivery.
- Analyzed sales across 20+ SKUs and 15+ distributors using EDA and Pareto analysis; delivered weekly and monthly insights for performance tracking and planning.
- Structured reporting data into lightweight fact and dimension models and built Power BI dashboards with DAX, drill-downs, and row-level security; improved dashboard consistency and contributed to reporting automation that saved ~184 hours annually.
- Supported Azure-based reporting workflows by validating Blob Storage files, checking ADF refresh outputs, assisting with source-to-target mapping, and using notebooks for ad hoc validation and historical backfills.

Amzen Machines Pvt. Ltd | IT Intern | India | Jul 2022 - May 2023

- Maintained Excel-based operational datasets across 4 core workflows during a 10-month internship, supporting production tracking, inspection follow-up, material status reporting, and internal operations reporting.
- Consolidated data from multiple files into structured trackers and summary sheets, improving visibility into pending, ongoing, and completed activities.
- Performed recurring quality checks across operational records, identifying issues in 4 key data-quality categories before internal reporting.
- Prepared 35+ operational summaries and documentation packs to support routine reviews and workflow monitoring.

CORE SKILLS

- Programming & Querying:** SQL, Python (Pandas, NumPy), Excel, Power Query.
- Reporting & Analytics:** Power BI, Dashboard Development, Reporting Automation, EDA, Data Modeling, Predictive Analytics.
- Data Quality & Business:** Data Validation, Data Reconciliation, Requirements Gathering, Stakeholder Management, Strategic Acumen.
- Cloud & Data Engineering:** Azure Blob Storage, Azure Data Factory, Databricks Notebooks, Azure, CI/CD, ETL.
- Tools:** Git, Jira.

SELECTED PROJECTS

- Reporting Automation & Validation Workflow** - Designed recurring validation checks and reporting steps using SQL, Python, Excel Power Query, and Power BI to improve report accuracy and reduce manual effort.
- AI - Document Intelligence / Analytics Copilot** - Building an AI-powered document intelligence system using Python, RAG concepts, embeddings, vector search and source tracing, with planned Gradio UI, Docker, cloud deployment, and image-processing support
- Big Data-Driven Insights: Trends in IT Skills for Education** - Analyzed IT job-market data from JustJoinIT using Python, PySpark, Dask, Azure, and GCP; built Power BI and Matplotlib dashboards to identify trends in skills, salaries, seniority levels, and regional demand.

EDUCATION

Master's in Data Science & Business Analytics | University of Warsaw, Poland | 2023 - Present

Bachelor's in Computer Science & Engineering | Maharshi Dayanand University, India | 2018 - 2022

Additional Training: Data Science & Machine Learning Program | Scaler Academy / Woolf University | 2023 - Present

CERTIFICATIONS

- Anti-Money Laundering (AML) - University of Warsaw
- Microsoft Azure Machine Learning for Data Scientists - Microsoft
- Create Machine Learning Models in Microsoft Azure - Microsoft
- Python Libraries for Data Analysis - Scaler Academy
